Dear Tom:

Enclosed please find copies of the chemical analyses performed on three samples received from our Utah plant. All samples were given a laboratory number upon arrival and attached analyses are again identified by these same numbers. A small description of where these samples were taken from and what they are composed of is also enclosed. It is to both of our interests if you and your department can help me in determining the processes which will be necessary for the eventual and successful reclamation of this property.

I hope to hear from you in the near future and if any additional information is needed, please do not hesitate to contact me.

Sincerely,

Philip N. Raines
